

Cass Mayor

The mayor of Cass this week announced his intention not to run for office again -- unless no one else would serve.

"I've had it seven years," said Carl Davis, 57, of Cass from his office at the Observatory in Green Bank where he works as an electronics

"It's more or less of a burden -- but we had to have street lights, and part-time policemen and garbage collection -- that's the only reason I stayed in there," Davis confessed. "It's more or less of a burden."

Coming up Friday night at 7:30 p.m. in the mayor's office in Cass is the bi-annual town meeting during which a mayor and five councilmen, plus a recorder, will be nominated from among the residents of the community.

Davis said this week that the salaries of the mayor and councilmen were sliced in half, down from \$250 per \$125 per year." do it in order enough money ate," Davis

lf, down

from \$250 per year to \$125 per year."We had to do it in order to have enough money to operate." Davis said candidly.

However, he added that the Council has since voted to raise the salaries back up to their former level as of July 1, after the election slated for the first Tuesday in June.
"We got the treasury built
up a little bit," he said,
"and then there was the
revenue-sharing money."

Davis said he had someone in mind who he would suggest Friday night, but he declined to disclose who that person was. He said the person he had in mind was retired and would have time for the job.

Currently serving on Council are Mr. and Mrs. Glen Grandon, plus Barbara Crist, wife of recorder Gene Crist, plus Eugene Jones and Sharon Casell. Mayor Davis surmised that two members of Council would probably step down from their posts.

"It's very hard to get anyone to serve," Davis commented. "It just takes a lot of your time. But rather than the town not having the services it needs -- well, it's just a donation, that's all."

Septic Systems: PART ONE

by James Cooper, sanitarian

Many parts of West Virginia, including Randolph and Pocahontas Counties, have problems with sewage disposal. Shallow soils, higher water tables, steep slopes, soils with a lot of clay and improperly constructed systems cause these problems.

To help clear up this trouble the West Virginia State Board of Health adopted a new set of regulations on July 1, 1970 trench is filled with topsoil and planted with grass.

Since the drain tiles are either plastic pipe with holes in the bottom or short sections of tile pipe with a gap between each sedtion, liquid can leak out of these distribution lines. The gravel helps to spread out the liquid on the bottom of the trench and it is then absorbed into the soil. Some soils absorb the liquid fast, others very

To get a permit in Randolph County, an application form may be obtained at the health department office at 209 Randolph Ave. in Elkins. In Pocahontas County, go to the county courthouse in Marlinton.

The application should then be filled out and returned to the health department. The application will be reviewed and if satisfactory, a permit will be issued giving permission to install the septic tani system.

Before the tank and pipes are covered with dirt, an inspection must be made by the health department to make sure everything is installed properly.

Interested? Read on.

We, the people at the Alle-gheny Journal (formerly known as the Marlinton Journal), have begun publication with this issue featuring a revised format, in-depth reporting and increas-ed circulation, in addition to providing individual attention to our advertising clients. We are serving the people of both Randolph and Pocahontas counties, keeping them in tune with local news and features.

Our circulation goal has been set at 6,000 subscribers. This is where you as our reader can play an important role. If you like the way we provide you with news, say so by filling out the coupon below-or stop in and see us at either one of our two offices, in Elkins or Marlinton. If you don't like the way we report news, by all means tell us. We're always ready for any constructive criticism.

Here's the bonus: subscribe during our first weeks of publication, and we'll give a dollar of your subscription money to the organization -- or individual -- of your choice.

And for PTA's, church groups, boys and girls who want to make money--come into our offices in Merlinten on Second Ave. or in Elkins above the Western Auto Store. Register and start sell-ing -- a buck for every subscription you sell.

Plus! To the group and the individual that sells the most-a 100 per cent bonus. If a PTA sells 500 subscriptions and no other organization sells more, we'll give you the \$500 you ear-ned plus \$500 more for a total of \$1,000. Cashi on the barrel-

Kwiz Kids

Win!

Pocahontas County's Kwiz Kids won their fourth straight victory Monday night on the Channel 7, WDBJ program, Klassroom Kwiz. Competing against Appomatox County High School of Appomatox County, Virginia, the threeman team racked up 180 points to their opponents' 130.

Team members Rick Wooddell, Mike Smith and Philip Horne will try for a fifth win next Monday.

The Army Reserve consists of more than one million officers and The new ter-town had jacked up gether during of the Council Months the Council water -- I been encounted basement building during one year.

exchange students they can a small stir of interest they arrive and then more or less fade into the crowd. Their effect on the school is minimal. With an exchange group this size, however, they really make a strong impression. We've tried to expand the program as much as possible through our use of host families living in different areas of the county."

According to Barksdale, the program has generated "a lot of interest for another exchange next year." Pocahontas County High School and The Hays School can remain "linked" schools for as long as they wish.

Was there anything in American they found unpleasant or disturbing during
their stay, the students were
asked in conclusion:

'Guns,' said Steven Ayres. 'So many people own guns around here. And they seem so easy to get hold of. At home even the policeman don't carry guns."

Anthing else?

"We've only seen West Virginia, and a bit of New York City when arrived," said Steve. "We need to see a lot more of America before we can generalize."

the

excl

tival, it was announced this week by the Pocahontas County Home Demonstration Council.

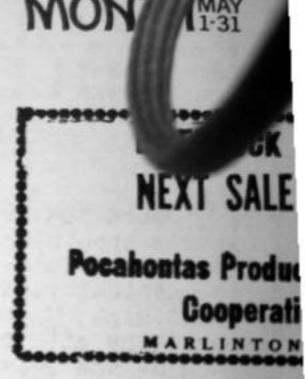

"This is the first I heard about it," Mrs. McNeill said when the Journal called her. "I sure am glad to hear about it."

Mrs. NcNeill, mother of four, grandmother of eight and great-grandmother of six, first applied for the honof being a Glenville "Belle" two years ago. "But I was beat out by another lady."

That lady was Mrs. Nellie Williams, 13th in a series that began in 1960 with Mrs. Elmer Moore in 1960. Since Mrs. Moore, there has been Mrs. Grace Yeager in 1961, Mrs. Coe Beverage in 1962, Mrs. Morrest Gibson in 1963, Mrs. Rachel Wooddell in 1964, Mrs. Nellie M. Shrader in 1965, Mrs. Walor Graham in 1966, Mrs.D. S. Ryder in 1967, Mrs. Eleanor McNeill in 1968, Mrs. Ray Horner in 1969, Mrs. Albert Curry in 1970, Mrs. Carrie Morrison in 1971, and then Mrs. Williams.

Mrs. McNeill has been active in the Edray home demonstration club for 37 years and a member of the Edray United Methodist Church WSCS for 46 years, almost half a century.

"I'm going to make a new dress if I go," Mrs. Mc-Neill said. Though currently tied down with a bad cold, she said she hopes to shake it by the time the four-day Folk Festival begins on June 14.

A 24-year-old girl chosen by her fellow contestants in the Miss Pocahontas pageant as "Miss Congeniality" walked off with the crown for the evening and the enthusiastic applause of a wellpacked auditorium at the Pocahontas County High School Thursday night.

Linda Barker Chosen Miss Pocahontas for 1973

From the trampoline to singing and playing on the piano and the guitar -- as well as a comedy skit -- the 10 girls in the contest performed for the judges, one of whom was a beauty pageant winner herself. Miss West Virginia of 1973.

This year's Miss Pocahontas is Linda Barker,
a small, poised member
of the Marlinton Business
and Professional Women's
Club who sang and played
selections from "The
Sound of Music" on the
piano.

Her singing and playing was so good, in fact, that she walked off with first place in that division, too.

Coming up with a close second was Roberta "Bob-bi" Jo Sharp, a country folk singer who, beneath the spotlights on either side of the stage, strummed and sang out a rendition of "Last Thing on My Mind."

Nailing down third place in the talent competition was Nancy Ellen Meck, a be-spectacled little girl from Cass

did an oral interpreta-

Master of ceremonies for the evening was one of Pocahontas County's most eligible bachelors, prosecuting attorney and gentleman farmer Gene Simmons.

Not one to stand on ceremony, Simmons did not delay the introduction of the winners of the contest, but rolled right into them.

Third runner-up was Lois Sharp, the girl who earlier in the afternoon had won the swimsuit competition, while second runner-up was Bobbi Jo Sharp, the country folk singer.

First runner-up was dark haired Sarita Lantz who performed a waitress skit.

Crownbearer for the evening was Little Miss Pocahontas, Susan Renee out onto the stage carrying the queen's tiara atop a small pillow.

After the presentation of the Miss Pocahontas ribbon, crown and roses, the audience came forward to lavish her with hugs and kisses.

A concert which lasted from disk until well past midnight opened a weekend of "good mountain music" on Friday, July 20, at the Morris Family Old Time Music Festival at Ivydale in Clay County.

The music continued Saturday afternoon and night with two more long concerts, despite onset of a severe rainstorm and high water that afternoon and evening. The musical program was wrapped up with gospel session and a final concert on Sunday afternoon.

Among the pertormers at Ivydale were Allegheny area residents Nowell and Suzie Creadick of Elkins, who accompanied the Appalachian music class of the Augusta Heritage Arts Workshop to the festival and made a banjo-playing appearance.

The festival crowd got a little more excitement than anybody had expected

JULIE WAMSLEY

MISTY HART KRISTIN GADD TERI HINKLE MARSHA VARNER

Police Judge For Marlinton

Marlinton could soon have a paid police judge, a salaried employee of the town who would act as judge and jury the half a dozen cases of intoxication and speeding that crop up in the Pocahontas County seat each week.

Marlinton Mayor H. Guy Fultz, a member of the board of directors of the W. Va. Council of Towns and Cities, said that the Council, in view of cases currently before the State Supreme Court, had recommended that those towns and cities which derived more than half their income from judicial fines should have a salaried police

judge.

Mayor Fultz said the idea was that an official of the town, paid by the town, would have an unfair interest in the outcome of a judicial case where his pay may make material difference in his pay.

Marlinton City Council is currently considering whether or not to hire a police judge -- probably at a salary of per month -- and a decision is anticipated at the next meeting of Co-

uncil.

Mayor Fultz said he had someone in mind -but he wasn't talking.

"It could be anybody at all," he said.

Triple-decker Falls

Established by the U.S. Forest Service as a Scenic Area, the main attraction of the 114 acre site at the Falls of Hills Creek is a series of three waterfalls, 20, 45 and 65 feet in height, surrounded by old-growth northern hardwoods, hemlock and rhododendron.

Located off W. Va. 39 twelve miles west of Mill

What to Do When th

Probably the most popular of the attractions for anybody who has a spare moment from all the hullabaloo of Pioneer Days is the Cass Scenic Railroad.

Whether you select the 22-mile round trip tour to Balk Knob, taking out four and one half hours; or travel the eight-mile line to Whittaker and back (a two-hour run), a ride on the Cass train is an experience that returns citizens of the 70's to the opening days of the 20th century, the last days of the 19th.

Up at Whittaker station, surrounded by green meadows and shady picnic groves, travelers can fetch themselves a drink of water, then head on to the Balk Knob terminal, the second highest spot in West Virginia and one of the most awesome scenic overlooks in the world.

Cass train trips head out from the station at Cass daily except Monday with one long trip and three short trips.

The long trip, a four and one-half hour ride, costs a mere four dollars for adults, two dollars for children five through eleven years old. The short trips of one and one-half hours are half that cost.

Three basic types of locamotives were used for logging American

Close by and peering into the skies are the great dishes of the National Radio Astronomy Observatory.

Looming up, almost apringing above the horizon as you drive along the Route

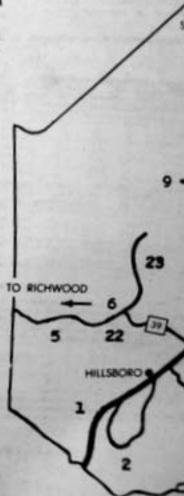

toward the observatory, the big dishes swing into view.

Operated by Associated Universities, the National Radio Astronomy Observatory is one of the leading centers for radio astronomy in the world.

The 300-foot scope at Green Bank is the largest movable radio telescope in the world, while close at hand is a 140 foot instrument as well as two 85-foot scopes.

In the summer, free tours are held each day, while in the fall, tours are held on weekends.

What else? Have a look:

The Corps' Plans to Flood Cass the Science Camp, Huntersville. by Joneld Teter, special

STORY BEFORENCES

sonigments reporter

The main line of the Cass Scentz Rattroad four feet under water? Imposathle, you say! It's very possible if the U. 5. Army Corps of Engineers has its way.

Actually, the project which would do It, "Greenbrier Lake, is only an

alternate."

What the Corps really wents to do is to build three lakes; one of 760 acres on the East Fork of the Greenbrier near Durhin and Bartow, one of 1,480 acres on Deer Creck near Cass, and one of 1,310 acres on Knapp Creek near Marlinton. These three projects are listed in the "Keneyhe. River Comprehensive Besin Study" as "farly Action Me jor Reservoirs."

If these three could not be built, then the Corps would turn its attention te building Greenbrier Lake, stretching along the Greenbrier for over 20 miles with a water surface of 4,850 acres. By conmariane, Summersville Lake

first at the alternate project, Crembrier The most obvious things about the lake are that it would sliminate over twenty miles of what has been described in Case Astiroad advertising brochures as "one of the most streams in America," and could flood the town of Clover Lick, Stony Setton,

It could also quite poswihly put the Cass Scenic Railroad out of business. The elevation of the surface of the lake's water at flood pool would be 2,445 feet, while the elewation in front of the Cass railroad station (at the top of the rail of the main line track) is only 2,441.5 feet, putting the tracks three and one-half feet under water when the reservoir is completely fil-

Even at the normal pool of 2,430 feet, the parking lot for the railroad and some of the town would apparently be flooded.

What would the other projects do? The East Fork Reservoir would flood both Thornwood and the 4-H Camp Pocahontas, site of the National Youth Science Camp each summer. The elevation of the Camp is about 2,950 feet, while the ele-vation of the lake's surface at normal pool would be 2,994 feet, at flood pool 3,009 feet - 50 to 60 feet under water.

Also flooded would be at least part of the historic site of the Max Rothkugel Tree Plantation, acres of which was one of to the manufacts purchased to the manufacture of the same of the same ten ten feet from the sign (on W. Va. M. J. S. Conto-W. Va. At. 28) merking the site of the Plantation has an elevation of 2,910 feet, below the level of the lake's surface.

> TO ELEIN'S MITTENSVILLE

Beer Lake would put 1,480 acres of water, and the recreation facilities to go with it, within a few miles of Cass, all clearly visible from the Bald Knob observation platform on the Cass Scenic Railroad.

Enapp Creek Lake would flood Huntersville, one of the oldest towns in Pocahontas County and the first county seat, incorporated December 18, 1822 by the

Wirginia General Assembly. Hinnehaba Springs would be on the very edge of 1,310 acres of water.

What are the chances of these lakes actually being built? When asked about the projects, the Corps

said that the official status of the projects is that they have not yet been authorized, that is, they have not received (nor, in this case, have they been submitted for) Congressional approval.

A Corps spokesman indicated that whether or not these lakes are eventually submitted will largely depend upon whether or not the Appalachian Fower Conpany's Blue Ridge Power Project, currently running into a great deal of opposition, is built on the New River.

If it is built there would there be enough lowflow augmentation capacity available for the Kanauha without building the projects on the Greenbrier. Low-flow augmentation is basically the release of stored water to improve the quality of polluted water downstream in this case, around Charleston,

of course, even if the Blue Ridge project to built the Corps dan revise to Greenbrier projects on time that it feels on time that it had no low-flow augmentation the Blue Ridge Reserved can provide is needed.

Actually the Sext Day

ginia legislature tam very close to personni blocking construction of Greenbrier Lake with the passage of the Batter Streams Preservation Act The act pruhibits my wen which would alter the free flowing characteristics of a substantial part of a protected stream, the Greenbrier River from in nouth to Enapy Creek he already been designated a protected stream " be egislative action stopped five niles short of permit nently preventing the construction of the lake.

Will these lakes he built? Only time, the Arm Corps of Engineers and the public can decide.

Deer Lake would put 1,480 acres of water, and the recreation facilities to go with it, within a few miles of Cass, all clearly visible from the Bald Knob observation platform on the Cass Scenic Railroad.

Knapp Creek Lake would flood Huntersville, one of the oldest towns in Pocahontas County and the first county seat, incorporated December 18, 1822 by the Virginia General Assembly.

Minnehaha Springs would be on the very edge of 1,310 acres of water.

What are the chances of these lakes actually being built? When asked the projects, the Corps'

said that the official status of the projects is that they have not yet been authorized, that is, they have not received (nor, they in this case, have been submitted for) Congressional approval.

A Corps spokesman indicated that whether or not these lakes are eventually submitted will largely depend upon whether or not the Appalachian Power Company's Blue Ridge Power Project, currently running into a great deal of opposition, is built on the New River.

If it is built there would there be enough lowflow augmentation capacity available for the Kanawha without building the projects on the Greenbrier. Low-flow augmentation is basically the release of stored water to improve the quality of polluted water downstream in this case, around Charleston.

Of course, even if the Blue Ridge project is built. the Corps can revive the Greenbrier projects any time that it feels acre low-flow augmentation the the Blue Ridge Reservoir can provide is needed.

Actually the West Virginia legislature can very close to permanently blocking construction of Greenbrier Lake with the passage of the Natural Streams Preservation Act. The act prohibits any work which would alter the freeflowing characteristics of a substantial part of a protected stream. The Greenbrier River from its mouth to Knapp Creek has already been designated a protected stream legislative action stopped five miles short of permanently preventing the construction of the lake.

Will these lakes be built? Only time, the Army Corps of Engineers and the public can decide.

by Donald Teter, special assignments reporter

The main line of the Cass Scenic Railroad four feet under water? Impossible, you say! It's very possible if the U. S. Army Corps of Engineers has its way.

Actually, the project which would do it, "Greenbrier Lake, alternate." is only an

What the Corps really wants to do is to build three lakes: one of 760 acres on the East Fork of the Greenbrier near Durbin and Bartow, one of 1,480 acres on Deer Creek near Cass, and one of 1,310 acres on Knapp near Marlinton. These three projects are listed in the "Kanawha River Comprehensive Basin Study" as "Early Action Major Reservoirs."

If these three could not be built, then the Corps would turn its attention to building Greenbrier Lake, stretching along the Greenbrier for miles with a water surface over 20 of 4,850 acres. By comparison, Summersville Lake has 2,723 acres; Sutton

Lake, 1,570 acres.

Just what would the construction of these projects do to the area? Let's look first at the alternate project, Greenbrier Lake. The most things about the lake are that it would eliminate over twenty miles of what has been described in Cass Railroad advertising brochures as "one of the most beautiful streams in America," and would flood the towns of Clover Lick, Stony Bottom, and Deer Creek.

It could also quite possibly put the Cass Scenic Railroad out of business. The elevation of the surface of the lake's water at flood pool would be 2,445 feet, while the elevation in front of the Cass railroad station (at the top of the rail of the main line track) is only 2,441.5 feet, putting the tracks three and one-half feet under water when the reservoir is completely filled.

Even at the normal pool of 2,430 feet, the parking lot for the railroad and some of the town would town would apparently be flooded.

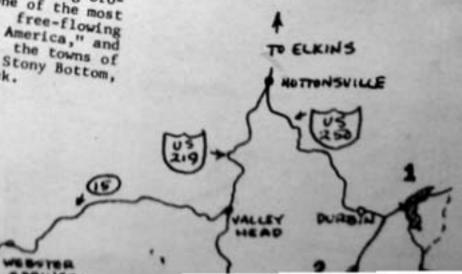

What would the other projects do? The East Fork Reservoir would flood both Thornwood and the 4-H Camp Pocahontas, site of National Youth Sci Science Camp each summer. The elevation of the Camp is about 2,950 feet, while the elevation of the lake's surface at normal pool would be 2,994 feet, at flood pool 3,009 feet - 50 to 60 feet under water.

Also flooded would be at least part of the historic site of the Max Rothkugel Tree Plantation, acres of which was one of the first tracts purchased for the Monongahela Nation-al Forest. A U. S. Geolo-gical Survey marker about ten feet from the sign (on 9,965 ten feet from the sign (on W. Va. Rt. 28) marking the site of the Plantation has an elevation of 2,910 feet, below the level of the lake's surface.

Flood PURPO!

Old-Time Music

What's five miles south of Hillsboro in Pocahontas County, coming up pretty soon and will probably bring visitors from as far away as New England?

And where are the Morris Brothers going to be on

July 27-29?

And what's going into its second year thanks to a grant from the Rockefeller Foundation?

If you haven't already guessed, it's the Old-Time Music Festival and Community Gathering, an annual summertime extravaganza.

Last year, according to Festival ringleader Betty Rae Weiford of the county extension service in Marlinton, it never stopped raining.

But that didn't stop an estimated 500 people from turning out to listen to old-time fiddlers, banjo players, singers and other traditional mountain musicians who kept right on making music through visions of parades of pairs of animals marching into arks.

"There was lots of black piastic," Mrs. Weiford commented blandly.

Even if it rains this year, however, things will still be better.

Water at the Festival's opening was provided by the friendly folks at the Green Bank National Radio Astronomy Observatory -- in a tank truck hauled over the mountains to the Jacox Road 4.8 miles south of Hillsboro on U. S.Rt. 219.

On tap last year were the Morris Brothers, commissioned by the Rockefeller Foundation to do a series of similar festivals across the Appalachians, in Virginia, West Virginia, Kentucky -- and southern Pocahontas County was chosen as one place.

Dave Morris is back again this year, serving as general manager, man-aboutthe Festival-grounds, master of ceremonies.

With him again this year -- as last year will be fiddle-plucking, banjo strumming Dwight Diller of Marlinton, Pocahontas County's own mountain music maestro.

All-day old-time Mountain music -- that's the ticket here -- along with good mountain fellowship, craft exhibitions and displays, good country food.

"We're trying to be very very mountain and pioneer," says Mrs. Weiford. "No soda pop -- just lemonade and sassafras tea, that kind of thing."

The Festival sort of opens -- "These things are kind of fluid," Mrs. Weiford says, leaning back casually in her chair --Friday night at 7:30 p.m. with the first of an almost continuous series of music programs.

The place where it all lays out is on the Johnny Hill farm south of Hills-boro, acre after acre of rolling fields where, this year, some extensive preparations have been made.

A power pole has been erected at the site, and a water tank is going up as well, along with lean-to type sheds for both musicians and craftsmen -- no more "lots of black plastic.

Parking, plus overnight tent and trailer camping, can be accommodated on the large pasture that borders the main area for demonstrations and performances.

Open to everyone, the Festival is expected to attract a larger crowd this year than last year.

"If the sun shines," Mrs. Weiford says, "It'll be a big crowd." This year, an announcement concerning the Festival was carried in the Library of Congress' annual listing of festivals and conventions of folk music.

Already, the extension office has had inquiries from New York, New England Washington . . .

Too, the performances are

open to anyone.
"We want the local oldtimers out here," Mrs. Weiford says. "Not just the professionals."

POLLY GIBSON REED

D

Polly Gibson Reed, 42, wife of Layke Reed of Elk, was found in her home in a semi-conscious condition about 4:30 p. m., yesterday (Wednesday) by her daughter, Mrs. Eleanor Jean Dilley, and died about 9:15 p. m. as she was about to be brought to the local hospital after efforts to revive her had failed.

A daughter of the late Mr. and Mrs. Jacob Gibson of Elk, Mrs. Reed had been washing in an outbuilding when last seen. When she was found she was in her bed in the house. It is presumed that the victim suffered a stroke in the wash house, as the washing machine was found still running, and, after falling, rallied enough to drag herself into the house and to her bedroom.

The tragedy happened on Mrs. Reed's 42nd birthday.

Funeral arrangements had not been made at the time of going to press.

Father Stabbed to Death After Son's Graduation

Another apparent murder, the second inside
of eight days, occurred
following graduation
ceremonies Friday night
at the Pocahontas County
High School when 37-year
old William Orville Taylor of Dunmore was stabbed to death just minutes after seeing his
son graduate.

Charged with murder and lodged in the Poca-hontas County Jail a-waiting a hearing is 33-year-old Boyd Marvin Pennington of Maxwelton in Greenbrier County.

NO NOV

He was charged by state police in Marlinton in connection withthe death.

Witnesses said a fight between the two erupted in the parking lot outside the school following the graduation ceremonies.

Taylor, the dead man, is survived by three sons and three daughters, all at home; his parents and two brothers, all of Dummore; one brother and a sister in Delaware and a sister in Georgia.

Still being held until his Wednesday morning hearing, June 6, is 70-year-old John Henry Oat-neal, the man charged in the shooting death of a 38-year-old Marlinton woman.

The Journal incorrectly stated last week that Oatneal had been jailed on \$10,000 bond following a hearing before Justice of the Peace R. S. Hollandsworth.

Oatneal was actually jailed without bond until a preliminary hearing could be set.

Pocahontas Strawberry Variety Is Found Best

A wet spring and unseasonably late frosts combined to make 1956 a "test" year for strawberries in many parts of West Virginia. Such conditions caused severe injuries to many of the standard varieties grown in the State.

Even under such conditions, however, one new variety-Pocahontas did well. Pocahontas, introduced by the USDA and the Virginia Truck Experiment Station in 1953, outyielded such standard varieties as Catskill, Fairland, and Vermilion in 1956. It was less injured by frost than most varieties, less subject to rotting, and gave a good crop of attractive berries. Whether it will continue to do this in more normal seasons is yet to be determined.

Horticulturists at the West Virginia University Agricultural Experiment Station regularly compare new varieties with standard varieties in replicated trials. These trials are supplemented by on-the-farm demonstrations. Pocahontas and Dixieland were tested in 1955, but an undetermined disease almost eliminated Dixieland, and injured Pocahontas rather severely so that definite conclusions as to their value could not be drawn. Dixieland did not meet with the general approval that Pocahontas did in the demonstration plantings.

A new trial at Morgantown in 1957 will compare Pocahontas, Dixieland, and four newly-named varieties-Earlidawn, Jerseybelle, Redglow, and Surecrop-with such standard varieties as Midland, Catskill, Vermilion, and Erie, Jerseybelle is an introduction of the New Jersey Agricultural Experiment Earlidawn and Redglow are introductions of the USDA, and Surecrop is a USDA Maryland introduction, Surecrop is considered as a replacement for Stelemaster which proved to be very subject to front injury in tune

Thursday, April 11, 14 of the red stele root he In some instances the introductions do well and an artistical Virginia condition, when other instances they are other instances the instances they are other instances they are other instances the instances they are other instances they are other instances the instances they are other instances they are other instances the instances they are other instances they are other instances the instances they are other instances they are other instances the instances they are other instances they are other instances the instance they are other instances the instances they are other instances they are other instances the instance they are other instances the instance they are other instances they are other instances the instance they are other instances the instance they are other instances the instance the ly unsuited. Information ly unsuited of these suitability of these four ties should be available

A rain is not classed as a select for more inch burst unless 6 or more box water falls at the rate of 11 more inches per hour.

OBITUARIES

JAMES EDWARD BUZZARD

James Edward Buzzard was born February 22, 1923, at Huntersville, departed this life April 15, 1957. A Navy veteran of World War II, he was the son of Rodney W. and the late Esta L. Alderman Buzzard.

He is survived by his wife, Mrs. Jewell McLaughlin Buzzard; three children, Sammy Edward, Judy Kay and Diane Sue; five brothers, Joseph Arnold of Weston, Noah Waldo of Huntersville, Harlen Lake of Washington, D. C., Hubert Harvey of Chincoteague, Va., and William Harding of Huntersville; three sisters; Mrs. Vera Sue Beahm of Waynesboro, Va., Mrs. Lola Workman of Millpoint, and Mrs. Pauline Gardner of Cloverlick. 12 nephews, five nieces, one grandnephew and two grand nieces also survive.

Funeral services were held on Wednesday afternoon at the Huntersville Methodist Church with the Rev. Lowell Legg officiating, assisted by the Rev. Charles A. Yoho. Burial was in the Beaver Creek Cemetery.

EASTER SEALS

Marlinton Barber Killed In Automobile Accident

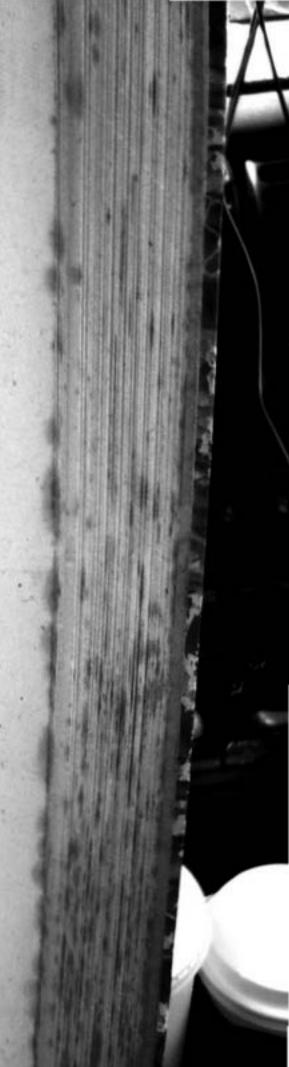

James Buzzard, 34, of Huntersville suffered injuries which led to his death several hours later when his car apparently went out of control and turned over on State Route 39 about three miles east of Marlinton. The accident occurred Sunday evening at about 6:30 as Buzzard was driving in the direction of Marlinton. He was alone in the car at the time and, so far as has been determined, there were no witnesses to the wreck. From the tire marks on and along the highway it has been deduced that the car went out of control on a slight curve left the pavement, swerved to the right and back to the left, traveling along the berm. When the car came back on the pavement, it turned over and rolled about 300 feet down the middle of the highway. Buzzard was thrown out of the car, apparently, about 60 feet from where the car finally came to a stop.

Jamie Abdella, Bob McComb and the Rev. Charles Yoho were among the first to reach the scene of the accident, While Rev. Yoho stayed with the injured man, Mc-Comb went for a doctor and Abdella hurried to Marlinton for an ambulance. Buzzard lived for nearly nine hours after being admitted to Pocahontas Memorial hospital.

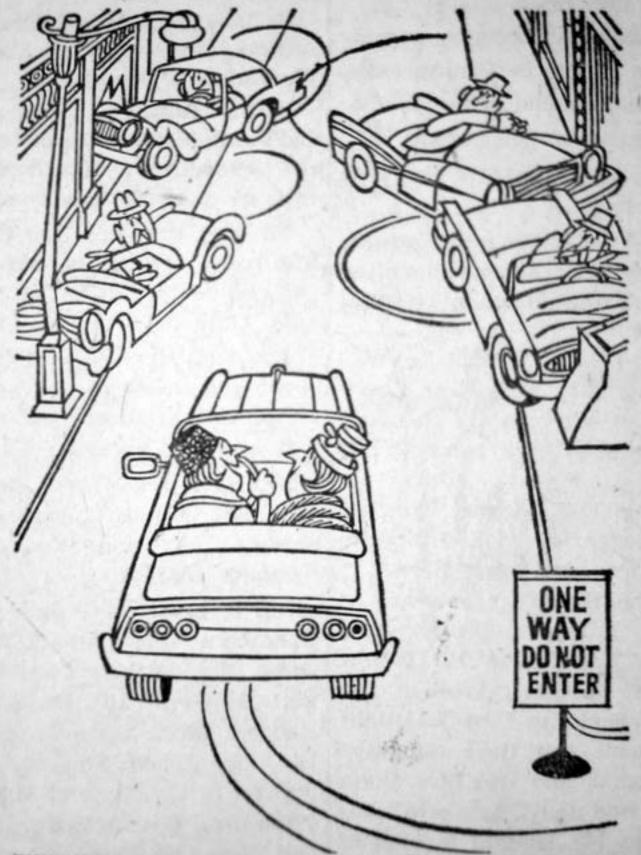

A son of Rodney W. and the late Esta L. Alderman Buzzard, the victim had maintained a barber shop, known as "Jimmy's", in the First National Bank building in Marlinton for about three years. He is survived by his wife and three children.

"Keep Pocahontas Beautiful" Parade Set For Saturday, May 4 The "Keep Pocahontas Beauti-

ful" committee met at the Marlinton Mayor's office on Monday night and made plans for the big parade that will feature the annual Clean-Up and Paint-Up drive. This year an effort is being

made to extend the drive to cover the entire county so that everything will be shipshape for the coming tourist season. Especially during the summer there are thousands of strangers driving through our county that may well be impressed with our show of good housekeeping along our highways as well as around our homes and farms.

This paper has been asked to stress the fact that all civic, patriotic and fraternal organizations, business places, musical organizatons, fire companies, churches, youth groups and the agricultural extension groups are urged to take an active part and, if possible, enter a representative unit in the parade. Any group or organiation wishing to enter the parade should contact Parade Marshal Leo Davis at once so that he will have an idea what to expect when the time comes to line up the procession.

The Marlinton town officials

VOLUME 41-NUMBER 44

MARLINT

Examinations To Be Held For Marlinton P. O. Job

Announcement has been made of the coming examinations to fill the office of Postmaster at Marlinton on a permanent basis. The position is currently being filled on a temporary basis by J. E. Buckley, who, when he accepted the appointment, made it clear that he was not interested in it as a permanent situation, but would fill in until a new postmaster could be selected.

Closing date for applications has been set for May 21, 1957. Applicants shall file application card Form DX73-69AB These forms may be obtained at the postoffice in Marlinton or from the United States Civil Service Commission, Washington 25, D. C. Applications should be sent to the Washington address and must not be postmarked later than the closing date. The written test will be held at Lewisburg.

The Marlinton Post Office is rated as a Second Class office with the Postmaster's salary listed as \$4,890 a year.
